

DL-METHIONINE

► Description

- DL-methionine, technically pure - $C_5H_{11}NO_2S$ - Feed grade.
- Category 3c (annex I of Reg. 1831/2003) code 3c301 - amino acids, their salts and analogues.
- Authorized for all animal species and allowed to be used via water for drinking.
- If the additive is administered via water for drinking, protein excess should be avoided.

Colour : white to yellowish
Texture : free flowing crystalline powder

► Chemical composition

Assay : min. 99% (HPLC-UV/FD - ISO/DIS 17180)
Loss on drying : max. 0,3%
Ash content : max. 0,5%

► Physical properties

Bulk density : $700 \text{ kg/m}^3 \pm 10\%$
Particle size distribution : min. 90% between 0 - $1000\mu\text{m}$

► Packaging

25kg bag

► Storage

Store this product in its original container. Keep containers tightly closed and store in a dry, cool and well-ventilated place. Protect from light and heat.
For user safety: breathing protection, safety glasses and gloves shall be worn during handling.

► **Shelf life: 3 years after production date in the original unopened packaging**
